SUMMARY

Full-stack developer (Sheridan College, 2025) who has shipped production tools and supported enterprise users. Built, as sole developer, a pricing app and API used by 50+ teams across 50+ warehouses, and handled ~500 ServiceNow tickets per term at the City of Mississauga. Works end to end in TypeScript, Angular, React/Next.js, Node.js and SQL.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Java, C, SQL, HTML5, CSS3, Bash
Frameworks: Angular, React, Next.js, Node.js, Express, ASP.NET Core, Entity Framework Core, Ionic, Electron, Tailwind CSS
Databases & Cloud: PostgreSQL (Supabase), MariaDB, SQLite, MongoDB; AWS (EC2, S3, VPC routing), Azure, Docker
Testing & Tools: Vitest, xUnit, Moq, Postman, Git/GitHub, GitHub Actions (CI/CD), Stripe API, Jira, Wireshark
IT Support & Data: ServiceNow, ITIL v4, Windows, macOS, Linux, hardware deployment; Excel, VBA, Power BI
AI-Assisted Development: GitHub Copilot, OpenAI Codex, ChatGPT, Claude, Gemini, Custom GPTs

EXPERIENCE

Data Analyst, AMJ Campbell | Mississauga, ON — Nov 2022 – Dec 2023

- Designed and built, as sole developer, a pricing calculator and location-based API (Next.js, React, MariaDB) that standardized pricing across 50+ warehouses for 50+ teams.
- Automated data workflows with SQL, Excel, Power BI and VBA, saving an estimated 1+ hour per person per day across 50+ teams.
- Wrote 20+ guides for RAMP inventory software, consolidated into a 120+ page master manual for training and onboarding.

Service Desk & Hardware Repair (Co-op), City of Mississauga | Mississauga, ON — Jan 2024 – Aug 2025

- Handled ~500 incident tickets per 4-month term in ServiceNow, documenting symptoms and steps tried for clean handoffs.
- Triaged and escalated issues to the correct group among 50+ specialized support teams.
- Resolved first-level software, hardware and connectivity issues for city staff, and repaired and deployed hardware from faulty peripherals to new servers for a city location.

Line Cook & Server, Cineplex | Oakville, ON — Oct 2024 – Present

- Work the kitchen line and the floor, keeping orders accurate on 250+ order nights; trusted with closing inventory.

PROJECTS

GOAT'eez | *Angular (SSR), TypeScript, Express, Supabase (PostgreSQL), Stripe, Vitest* — 2026

- Built everything except the visual front-end of a team e-commerce store for custom shirts: Angular migration, backend, database schema, APIs and a multi-zone Fabric.js designer.
- Implemented cookie-based auth with refresh tokens, email verification, password reset and role-based admin dashboards with activity logs.
- Integrated Stripe checkout and webhooks, guest-to-account cart merging and shareable saved designs; fixed Supabase RLS vulnerabilities.

FinanceTrackerApp | *Electron, React, TypeScript, SQLite, ECharts, Vitest, GitHub Actions* — 2026

- Built an offline finance tracker that imports CSV/Excel bank statements and never records a transaction twice, even from overlapping files.
- Added budgets, goals, debt planning and recurring-charge detection; shipped 4 releases with Windows/macOS installers via CI, with 40+ test files.

ScentWardrobe | *Electron, React, TypeScript, SQLite, Tailwind CSS, Vitest* — 2026

- Built a fragrance manager with a layering engine that scores pairings 0–100 and learns from ratings; tested upgrades across 8 schema versions.

EDUCATION

Advanced Diploma, Information Systems Engineering (Co-op) | Sheridan College, Oakville, ON — 2022 – 2025

- Capstone: As one of two developers on a 5-person team, built the backend for a client's full-stack e-store (Angular, TypeScript, Node.js, Web API, SQL) with role-based access control, logging and deployment.
- Coursework (87% average): iOS (SwiftUI), OOP in Java, web programming, ASP.NET Core/C#, AWS, IT Process Management (ITIL v4), data structures in C, network security.

Certifications: Google Technical Support Fundamentals; Google Foundations: Data, Data, Everywhere
